OCI at a glance | Company Profile

- **Foundation (Spin-off)** : August 5, 1959 (May 1, 2023)
- **Headquarter** : 94 Sogong-ro, Jung-gu, Seoul, Korea
- **Representative Directors** : Yoo Shin Kim (Vice Chairman) , Won Hyun Kim(President)
- **Employees** : 1,618 (As of March 31, 2025)
- **Main Businesses** : Basic Chemicals, Petrochemicals & Carbon Materials
- **Business Locations** : Seoul, Gwangyang, Gunsan, Pohang, Iksan, etc.
- **Market Capitalization** : KRW 523.7 billion (as of May 19, 2025, ranked 297th in KOSPI)

Stock Price (May 20, 2024 ~ May 19, 2025)

(Unit : KRW)

OCI at a glance | History

Overview

- Established Date : August 5, 1959 (Spin off on May 1, 2023)
- Business Division
 - Basic Chemicals : EG¹⁾ Poly-Si, Phosphoric Acid, Hydrogen Peroxide, HCDS, Chlor Alkali, Fumed Silica, TDI, etc.
 - Carbon Chemicals : Carbon Black, Pitch, BTX(Benzene, Toluene, Xylene), Plasticizer, etc.

1) EG: Electronic Grade

OCI at a glance | Main Business Locations

OCI Main Business and Subsidiaries Locations

OCI at a glance | Earnings by Division

- Although the business environment was deteriorated in 2024 due to decreased demand and product prices caused by the global economic downturn, OCI outperformed peers thanks to strong performance in several products and one-time gains
- Plan to strengthen profitability and risk management by focusing on production efficiency, sales expansion, and cost reduction

Note : 2022 is based on pre-spin-off separate financial statements of OCI
 2023 is based on post-spin-off financial statements of OCI; January to April reflects adjusted but not audited results, provided for investor's comparison
 2024 is based on consolidated financial statements of OCI Company; Reflect 5 subsidiaries that were incorporated from Feb

OCI at a glance | Sales Revenue by Products

- Basic Chemicals, including Semiconductor Materials account for about 37% of sales
- Carbon Chemicals, including Carbon Black No.1 in domestic market share and Pitch No.3 in global market share account for about 62% of sales

Sales Revenue by Products (2024)

* EG Poly-Si, Hydrogen Peroxide, Phosphoric Acid, HCDS

** Revenue breakdown after elimination of inter-company transactions

OCI at a glance | Sustainable Management

- In July 2021, 'ESG Committee' was established under the BOD to accelerate ESG strategy and related investment decision
- OCI achieved ESG integration rating⁽¹⁾ of A in 2023 for the seventh consecutive year, which demonstrates the company's status as one of the best sustainability management companies in the industry
- Named 'Best ESG Companies' for H1 2024 by Sustainvest and awarded the highest rating of AA
- Earned a 2024 'Gold medal' (top 5%) from global ESG rating agency EcoVadis, with excellent ratings especially on environment and labor

Environment

- Initiatives to combat climate change (carbon emission reduction, improving energy efficiency, enhancing compliance)
- Earn ISCC Plus certification, an international eco-friendly certification, by producing eco-friendly carbon black

Society

- Supply chain management, green purchasing, fair competition, etc
- Strengthen interactive communication between the market and stakeholders

Governance

- Strengthen activities of outside directors consisting of professionals by field
- 'ESG Committee', establish ESG strategy and promote related investment decisions

(1) Assessment Committee : Korea Corporate Governance Service (KCGS), Participants : A total of 1,049 companies in 2023, Rating Grade : S, A+, A, B+, B, C, and D (7 grades), Based on pre-spin-off

Basic Chemicals | Major Products

Major Products

	Features	Capacity	Application	Major Clients
EG Poly-Si	The only domestic manufacturer of EG Poly-Si	4.7KT in Gunsan Plant	Wafer (I/C Chip core material)	SK Siltron, etc.
Phosphoric Acid	- Manufacturing high-purity Phosphoric Acid for semiconductors - No.1 domestic market share	26KT in Gunsan Plant	- Wafer Etching - LCD Etchant raw materials	Samsung Electronics, SK Hynix, etc.
Hydrogen Peroxide	Manufacturing electronic / industrial, and semiconductor grade Hydrogen Peroxide	75KT in Iksan Plant - P&O Chemical¹⁾ 50KT	- Wastewater treatment, PCB Etching, etc. - Semiconductor Cleaning Process	Dongwoo Fine-Chem, Kioxia, etc.
HCDS	Manufacturing with STC gas as a raw material	18MT in Gunsan Plant	Semiconductor Precursors	Hansol Chemical
CA (Chlor Alkali)	Manufacturing NaOH, NaOCl, HCl, etc.	- NaOH 117KT - NaOCl 110KT - HCl 160KT	- Neutralizers, Cleaners, Wastewater treatment, etc. - Secondary Battery Precursor Manufacturing Process, etc.	Samsung Electro-Mechanics, Samsung Electronics, etc.
FS (Fumed Silica)	The only domestic manufacturer of Fumed Silica	9KT in Gunsan Plant	Silicone Sealant, Paint, Semiconductor CMP Slurry, etc.	ShinEtsu, Wacker, etc.
TDI	Manufacturing with Naphtha, etc.	50KT in Gunsan Plant	Polyurethane raw materials	Alfome, INOAC, etc.

1) P&O Chemical : Acquired the remaining 51% shares in POSCO Future M as of February 2025 (previous ownership structure: POSCO Future M 51%, OCI 49%)

Basic Chemicals | Major Products

Silicon-based Products Value Chain

- Manufacturing EG Poly-Si, FS, HCDS, etc. by using MG-Si as raw materials
- Based on current business, OCI plans to expand semiconductor and secondary battery materials business such as Specialty Etchants and Precursors

Basic Chemicals | Major Products

Silicon-based Products Manufacturing Processes

Basic Chemicals | Major Products

Basic Chemicals Products Value Chain

- OCI builds a diversified product portfolio with stable domestic demand
- Major product sales expected to grow due to increased demand for semiconductors, secondary batteries
- The company plans to expand into a high value-added business

Basic Chemicals | Mid-to-Long-Term Market Outlook

- Gradual economic recovery and mid-to-long-term growth in the semiconductor market, along with business expansion in advanced materials, are expected to drive Basic Chemical's performance growth in mid-to-long term.

Carbon Chemicals | Major Products

Major Products

	Features	Capacity	Application	Major Clients
Carbon Black	No.1 in domestic market share	170KT in Pohang Plant 100KT in Gwangyang Plant - Hyundai OCI¹⁾ 150KT - China JV²⁾ 80KT	- Tire - High-voltage wires - Ink, Paint, etc.	Bridgestone, Michelin, Hankook Tire, Nexen Tire, etc.
Pitch	- The only domestic manufacturer - No.3 in global market share	120KT in Pohang Plant 100KT in Gwangyang Plant - China JV³⁾ 300KT	Aluminium smelting, Fire brick, etc.	Aluminum smelters in the Middle East, Australia, etc.
BTX	Benzene, Toluene, and Xylene	260KT in Gwangyang Plant	- Plastic raw materials - Solvent - Synthetic materials, Paint coatings, etc.	Kumho P&B, TKG huchems etc.
PA/ Plasticizer	- Manufacturing PA and other products using coal tar as raw materials - Developing eco-friendly plasticizers	- PA 80KT - Plasticizer 65KT	- Plasticizer: Softeners for plastic products - PA: Raw materials for plasticizers	TSC, KCC, LX hausys, etc.
High Softening Point Pitch	P&O Chemical⁴⁾	15KT in Gongju Plant	Secondary battery anode coatings	

- 1) Hyundai OCI : HD Hyundai Oilbank 51%, OCI 49%
- 2) OJCB : OCI China 51%, Zaokuang 49% (In the process of liquidation)
- 3) SD OCI : OCI China 80%, Xuechen Energy 20%
- MS OCI : OCI China 60% Ma Steel 40%
- 4) P&O Chemical : Acquired the remaining 51% shares in POSCO Future M as of Feb. 2025 (previous POSCO Future M 51%, OCI 49%)

Carbon Chemicals | Major Products

Major Products Value Chain

- OCI is manufacturing Carbon Black, Pitch, BTX, etc. from Coal Tar and Coke Oven Light Oil, which are byproducts of steel manufacturing
- OCI ranks No.3 in global market share for pitch and No.1 in domestic market share for carbon black based on superior competitiveness

Carbon Chemicals | Major Products

Major Products Manufacturing Processes

Carbon Chemicals | Business Updates

- OCI is increasing its market share in Korea, China and Southeast Asia, and aiming to expand its portfolio of value-added products
- OCI expands its presence in the Korean and Asian carbon materials markets through JV partners that can supply stable raw materials

Capacities of OCI and Subsidiaries

Status of subsidiaries

Company	Site	Business	OCI Share	Capacity	Commercial-ization
HD Hyundai OCI ¹⁾	Korea	Carbon Black	49%	150,000MT	Q1 2018
OJCB ²⁾	China	Carbon Black	51%	80,000MT	Q3 2016
SD OCI ³⁾		Pitch, Carbon Black Oil	80%	380,000MT*	Q2 2010
MS OCI ⁴⁾			60%	350,000MT*	Q3 2016

1) HD Hyundai OCI : HD Hyundai Oilbank 51%, OCI 49%

2) OJCB : OCI China 51%, Zaokuang 49%
(Liquidation process in progress as of Mar '25)

3) SD OCI : OCI China 80%, Xuechen Energy 20%

4) MS OCI : OCI China 60% Ma Steel 40%

*Based on distillation capacity of Coal Tar

Carbon Chemicals | Carbon Black Demand

- Despite current market challenges, the global carbon black market is projected to grow steadily at about 3% annually from 2024 to 2030, driven by increasing tire demand from electric vehicle expansion
- The specialty carbon black market is expected to grow at approximately 5% annually from 2024 to 2030, driven by rising demand for high-voltage cables from AI and renewable energy sectors

OCI at a Glance

2

Basic Chemicals

3

Carbon Chemicals

4

New Business

5

Financial Performance

New Business | New Investments & Business Updates

Semiconductor and battery materials

- **Phosphoric Acid**
 - Increase production volume and efficiency through debottlenecking and expand customer base
- **Hydrogen Peroxide & HCDS**
 - Enhance performance via customer expansion, process improvements, and sales diversification
- **Specialty Materials for Silicon Anodes(SiH4)**
 - Completion of plant construction targeted for 1H '25, with mass production starting in 2H '25
 - Considering additional capacity expansion with the customer for mid-to-long term
- **Consider entry into Si-based materials and specialty etchants, in the mid-to-long term**

Carbon materials

- **Expansion of High-value-added Businesses**
 - Specialty Carbon Black : Capacity expansion for conductive carbon black in '25, with production starting in 2H '26
 - Eco-friendly Carbon Black : Plan to expand business in the mid-to-long-term, securing stable raw material supply through the acquisition of Saehan Recycle
 - Pitch for Synthetic Graphite : Enter and scale up gradually into the pitch market for isotropic synthetic graphite used in semiconductor and defense industries
- **Reviewing the entry into high-margin regions and new businesses in mid-to-long term**

Additional Highlights

- **Credit Rating & Bond Issuance**
 - Maintained A+ credit rating from major agencies. Issued KRW 150 billion in bonds for refinancing and operations

New Business | M&A

Expansion of Advanced Materials and ESG Business

- **Additional Acquisition of P&O Chemical Shares**

- Strengthening competitiveness and expanding semiconductor, battery materials business through acquisition of remaining 51% stake in P&O Chemical (KRW 53.7bil)

- **Acquisition of Saehan Recycle**

- Securing raw materials for high value-added eco-friendly carbon black with acquisition of Saehan Recycle, a recycled oil producer
- Plan to strengthen mid-to-long term ESG business by carbon emission reduction through resource circulation

P&O Chemical Overview

- **Established Date** : July, 2020

- **Major Products**

- 1) **H₂O₂** (Hydrogen Peroxide)

- Capacity : 50,000MT/yr
- Producing H₂O₂ using COG (steel by-product)
- Used in cleaning processes in the semiconductor and various industries

- 2) **HSPP** (High Softening Point Pitch)

- Capacity : 15,000MT/yr (Planned)
- First successful domestic development of the technology
- Anode coating material to enhance stability and efficiency

Saehan Recycle Business Structure

New Business | Specialty Materials for Secondary Battery

- **Signed long-term supply contract of specialty materials for silicon anode with Nexeon**
 - Signed a contract with Nexeon, a leader of next-generation silicon anodes technology, to supply raw materials for silicon anode
 - A long-term supply contract worth KRW 70 billion of specialty materials for silicon anode with Nexeon for 5 years from '25
 - The growth rate of the secondary battery market is expected to slow down slightly in the short term, but high growth is expected in the mid to long term.
 - Silicon anode market is forecast to grow at a CAGR of 39% by 2035

Silicon Anode Market Outlook

Source: SNE Research('24)

Specialty Materials for Silicon Anode Biz. Plan

Overview

- **Location** : Gunsan Plant
- **Initial Production Capacity** : 1,000 MT
- **Completion and Production Schedule** : H1 '25
- Considering further expansion depending on market demand

Financial Impact

- **Estimated investment cost** : Approx. KRW 20 billion
- **Estimated sales** : Over KRW 70 billion in 5 years from '25

New Business | Specialty Materials for Secondary Battery

- Plan to establish a specialty materials plant for silicon anodes at the Gunsan plant, and sell parts of the adjacent land to Nexeon to build Nexeon's silicon anodes plant
- Plan to supply the specialty materials through pipeline connected with the Nexeon's plant directly, and expand capacity when the market demand increases
- Have cost competitiveness by using raw materials generated during EG Poly-Si production

New Business | Specialty Materials for Secondary Battery

■ Nexeon Ltd.

- Developed silicon-based Li-ion battery anodes since 2006 in UK
- A leading company in silicon-based anodes technology with over 170 patents
- Signed a long-term supply contract with Panasonic Battery Company in June 2023

■ Technology

- Developed second generation silicon anodes with high silicon content : next-generation anodes with increased energy capacity and density without silicon expansion
- Achieving the same performance with less usage than traditional graphite anode
- Significantly improved energy density, mileage and charging speed with silicon anode
- With proprietary anode structure, reduced silicon expansion and improve battery life
- Can substitute existing silicon anodes
- Mass production available with Nexeon's production technology
